# REIGNITION FEATURE

★ YS ★

How to use the Reignite feature on the ACS Controller.

If you run out of pellets during a cook, the following steps will walk you through using the reignite feature on the ACS controller.

NOTE: The controller must be running at least version 1.0.18 to use this feature. To confirm the firmware installed on your controller, press the menu button and use the selector knob and rotate it clockwise until you highlight About on the screen and then press the knob. Here you will see the version of the firmware under the model of your grill.

```
◄ back    Main Menu
          WiFi
          Reignite
          Settings
◄ prime   About
```

```
◄ back    About
          Model: YS640
          Version: 1.0.18
          FireBoardVersion:
◄ prime   1.0.23
```

To update your controller, please confirm that you are connected to Wi-Fi so the latest firmware can be installed automatically. For assistance with connecting the Wi-Fi, please refer the user manual or contact Customer Service by calling 877-409-6337 option 2 or emailing customerservice@yodersmokers.com

1. Press one of the side buttons next to the LCD screen to pull up the side menu.

```
        ▼350°F
190°F
```

2. Press the button next to **MENU**

```
◄ view   PIT & PROBES
◄ menu   94°F
◄ prime
```

3. At the Main Menu, use the selector knob and turn it clockwise until you see the **REIGNITE** option.

```
◄ back    Main Menu
          Time Cook Program
          Temp Cook Program
          Custom Programs
◄ prime   WiFi
```

4. Press in on the selector knob with **REIGNITE** highlighted on the LCD screen.

```
◄ back    Main Menu
          WiFi
          Reignite
          Settings
◄ prime   About
```

5. To activate the Reignite feature, press the button next to **IGNITE** that is displayed on the LCD screen. The controller will reset and then begin feeding pellets for 30 seconds and then power on the igniter for the next 4 minutes to light the pellets.

```
◄ back    Reignite
          Use this option to
          prime and reignite
          your cooker after
◄ ignite  refilling the pellets.
```
