# VERIFYING PROBE TYPE

There are two probe types used in S-Series pellet grills, the type of probe must be verified as they are not interchangeable. To verify the type of probe that your pellet grill was built with, please follow these steps.
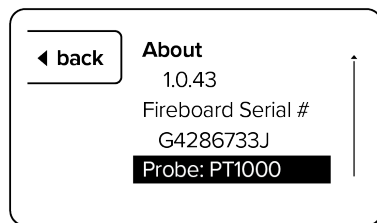

NOTES: *This information will be needed to order a replacement probe.*
*Controller must have at least firmware 1.0.43 installed.*

◀ start ◀ menu ◀ prime ★YS★	**Press the menu button at the main screen.**
◀ back ◀ prime **Main Menu** WiFi Reignite Settings About	**Rotate the selector knob clockwise, highlight About and press the knob. Then rotate knob clockwise again until you see probe under About.**
◀ back **About** 1.0.43 Fireboard Serial # G4286733J Probe: PT1000	**This shows that the controller requires the PT1000 probe.**
◀ back **About** 1.0.43 Fireboard Serial # GHKK3G7RD Probe: Type J	**This shows that the controller requires the Type J Thermocouple.**
